

Required Documents for Air Freight Services

To arrange an air freight shipment, importers and exporters should prepare the relevant shipment details and supporting documents. The exact requirements depend on the cargo, country of origin, destination and applicable regulations.

Documents Commonly Required

1. **Commercial Invoice** — Describes the goods, quantities, unit prices and total shipment value.
2. **Packing List** — Provides package count, dimensions, gross weight and net weight, where applicable.
3. **Air Waybill (AWB)** — The air cargo transport document issued or arranged through the airline or freight forwarder.
4. **Shipper and Consignee Details** — Names, addresses and contact information for the sender and receiver.
5. **Purchase Order or Sales Contract** — May be required to support the commercial transaction.
6. **Import or Export Declaration** — Customs declaration and associated documents as required by the relevant jurisdiction.
7. **Product-Specific Permits or Certificates** — Required for regulated goods, where applicable.
8. **Cargo Dimensions and Weight** — Needed to assess chargeable weight and obtain a freight quotation.

9. **Certificate of Origin** — Required when applicable under destination, customs or trade requirements.

10. **Insurance Documents** — If cargo insurance is arranged.

Additional Documents for Pakistan Imports

Depending on the goods, the shipment may require applicable Pakistan Single Window (PSW) or customs documentation, permits, regulatory approvals or product-specific certificates.
